

Medical Cost Projection Reports

A Medical Cost Projection Report is a comprehensive and affordable projection of an injured individual's future medical costs. It can be an effective tool for setting reserves, helping advance negotiations to achieve settlement, auditing existing files, and aiding MSA professional administration. Medivest is here to help you find creative solutions. Contact us today for an accurate MCP Report.

Accurate Projections From Experienced Nurses

Our knowledgeable team of nurses closely reviews medical records to determine the reasonable type, amount, and cost of future medical care. Findings are based on medical information such as:

- Treatment patterns appearing in the medical records
- Prescription medication usage
- Physician recommendations regarding future treatment
- Evidence-based guidelines

Use a MCP Report:

- When a MSA allocation report is not indicated
- To have an extensive report showing the value of an injured person's future medicals prior to negotiations
- To help set reserves when planning for a settlement or ensure reserves are accurate
- When a Workers' Comp claim is unlikely to settle, and there is a desire to have the open medical claim professionally administered.

Start Your MCP Report Today

Getting started is simple. Begin by completing our online Referral Form, then provide the following:

- The first report of injury or the loss statement/date of accident
- The most recent 2 years of medical records
- The most recent 2 years of Rx history/records

Medivest has a 10-business day turnaround time once all documents have been received. For an additional fee, a 5-business day rush report may be requested. For an accurate analysis of future treatment costs, and results you can count on, contact our settlement consultants today.
