

Break Deadlocked Settlement Negotiations

Sometimes there are difficulties in reaching a settlement agreement. Successful negotiation requires compromise from both sides. Both parties must gain something, and both parties must be prepared to give up something. But what if you could offer Professional Administration as an innovative strategy to resolve the deadlock?

Why Professional Administration can give you the edge to settle more cases.

1. **Either side can pay Professional Administration fees** to ensure the injured individual's medical funds are insulated from poor decision-making and funds are spent down according to the MSP guidelines.
2. **Either side can receive the remaining funds after death of the injured individual.** Any unspent medical funds can either revert to the funding party, a named beneficiary, the injured individual's estate, or any combination that the settling parties negotiate.
3. **Transfer the Risk and ensure compliance for all parties.** Utilizing a Professional Administrator puts the burden on someone else for making sure future medical funds are properly spent. If money is not spent correctly, the professional administrator is on the hook for reimbursing the MSA account.

Medivest helps settling parties engineer a win-win solution in every State. From the simple straightforward claims to the most complex, we have developed resolutions that address an array of post-settlement concerns. Medivest can help you integrate Professional Administration into your cases today. Contact us today for a free case consultation.

About Medivest

This year, Medivest proudly celebrates 25 years in business. In 1996, Medivest was recognized by The Centers of Medicare and Medicaid Services (CMS) for professionally administering the first Medicare Set-Aside (MSA) arrangement. Today we are a national company who continues to be a leader in Medicare Secondary Payer (MSP) compliance. We have developed into a full-service industry innovator, creating effective methods, and providing solutions aimed at achieving a higher net settlement while ensuring MSP compliance.
